ABOUT

Full-Stack Developer with proven expertise in building modern web applications using **React.js, Next.js, and Node.js (Fastify)**. Skilled in designing and developing **scalable, high-performance software systems**, with hands-on experience across both **SQL and NoSQL databases**. Strong background in **API design, agile methodologies, and cross-functional collaboration**, with a passion for delivering efficient solutions that drive real business value.

EXPERTISE

React.js / Next.js / Node.js / Fastify / Node-RED / PostgreSQL / MySQL / MongoDB / Tailwind CSS / HTML5 / CSS3 / Git / GitHub / Postman / Agile / Jira / Trello

EDUCATION: 2022

King Mongkut's University of Technology North Bangkok (KMUTNB)

- Bachelor of Computer Science

CERTIFICATIONS

Analyzing Big Data with Microsoft R : **Exam 773**

Perform Cloud Data Science with Azure Machine learning : **Exam 774**

Machine learning - Certified 2019 : **MCSA**

REFERENCE

Tipaphon L. : 065-285-5551

WORK EXPERIENCE

Full-stack Developer Apr 2024 - Present **Tech Stellar co., ltd.**

As a Full-stack Developer, I build and maintain web applications using **Next.js, Fastify, and PostgreSQL**, tailoring solutions to client needs. I work closely with system analysts to translate requirements into functional systems, delivering in **Agile sprints**. My experience spans **frontend, backend, CMS platforms, and data management systems**, with responsibilities in **database design, secure authentication, and third-party integrations** (e.g., LINE CRM) to enhance automation and user engagement.

Full-stack Developer Jan 2023 - Feb 2024 **Helios technology co., ltd.**

At Helios Technology, I redesigned and optimized existing web applications to improve **user experience and performance**. Using **React.js and Tailwind CSS**, I built modern, responsive interfaces and collaborated with the backend team to ensure seamless data flow. My responsibilities included implementing **secure authentication**, integrating **RESTful APIs** for full CRUD operations, and translating project requirements into **scalable system designs**.

Internship May 2019- Aug 2019 **SCG(Thailand) Co.,Ltd: Saraburi Plant**

During my internship, I developed a **web-based application** for automated **production planning** in packaging manufacturing. I gathered requirements from users, translated business needs into technical specifications, and built a system that enabled operators to visualize and plan production schedules using **predictive analytics**. I trained a **machine learning model** to forecast weekly production demand, combining **frontend, backend, and data processing** with applied data science to deliver a scalable solution.
