Address

337/136 Nonthaburi road Tasai
Muang Nonthaburi 11000 Thailand

About Me

Fullstack Developer with strong experience in building web applications using React.js, Next.js, and Node.js (Fastify). Passionate about building scalable and efficient software systems, with hands-on experience in both SQL and NoSQL databases. Strong in collaboration, agile practices, and API design.

Skills

- React.js / Next.js
- Node.js / Fastify / Node-RED
- PostgreSQL / MySQL / MongoDB
- TAILWIND CSS / HTML5 / CSS3
- Git / GitHub / Postman
- Agile / Jira / Trello

Certifications

Analyzing Big Data with Microsoft R
Exam 773

Perform Cloud Data Science with
Azure Machine learning
Exam 774

Machine learning - Certified 2019
MCSA

Experience

INTERNSHIP

May 2019– Aug 2019

SCG(Thailand) Co.,Ltd (saraburi plant)

(4 months)

During my internship, I developed a web-based application for an internal project focused on automated production planning for packaging bags. I was responsible for gathering requirements directly from users, analyzing business needs, and transforming them into technical specifications. The system allowed operators to visualize and plan upcoming production schedules based on predictive analytics. I trained a machine learning model to forecast what types and quantities of bags would need to be produced each week, and at what time. The project combined frontend and backend development with data processing and predictive modeling, offering a well-rounded experience in both software engineering and applied data science.

Full-stack Developer

Jan 2023 – Feb 2024

Helios technology co., ltd.

(1 Year 2 months)

At Helios Technology, I was responsible for redesigning the layout and improving the core functionality of existing web applications to enhance user experience and performance. I worked extensively with React.js and Tailwind CSS to create modern, responsive user interfaces, and collaborated closely with the backend team to ensure smooth data flow across the system. My role also involved integrating secure authentication mechanisms and utilizing RESTful API endpoints to perform full CRUD operations including data retrieval, updates, and deletion. Additionally, I was actively involved in analyzing project requirements and transforming them into efficient and scalable system designs.

Full-stack Developer

apr 2024 – present

Tech Stellar co., ltd.

(1 Year 3 months)

As a Full-stack Developer, I have been responsible for developing a variety of web applications across multiple projects, adapting technology stacks such as Next.js, Fastify, and PostgreSQL based on specific client requirements. Working closely with system analysts, I translate technical documentation and project briefs into fully functional systems, and deliver in iterative sprints following Agile methodology. My scope of work covers both frontend and backend development, including public-facing websites, backend systems, CMS-driven admin panels, and master data management platforms. I also contribute to database design and optimization, ensure secure login authentication, and integrate third-party systems such as LINE CRM to enhance user communication and automation.

Education

Bachelor of Computer Science

Institution: King Mongkut's University of Technology North Bangkok. (KMUTNB)
Year of Graduation: 2022
